

APPLICATION

The blocfor™ R are 20m and 30m self-retracting fall arresters equipped with a recovery winch. They can be fitted with galvanized or stainless-steel cable. They can be attached to the davimast mast using a specific Tractel® console. The blocfor™ console for davimast is equipped with an EN795A 150kg anchor point intended to secure an operator on the surface

TECHNICAL CHARACTERISTICS

The main physical characteristics of the blocfor™ R 20-30 are:

- B20R Plastic housings in polyamide filled with ABS, anti-UV very resistant to shocks and aging.
- B30R anti-UV aluminium casing very resistant to impact and aging
- A locking mechanism equipped with a double pawl reduces the pawl engage time in the toothed wheel of the brake.
- Optimised ergonomics for easy grasping and handling.
- A device anchor point designed to receive large diameter connectors

DESIGNATION	Code	HT	LG	EP	Weight without console	Weight with console
B20R G	084362	900mm	276mm	118mm	10.2kg	19.4kg
B30R G	084372	930mm	298mm	133mm	17.8kg	27,0kg
B20R I	084382	900mm	276mm	118mm	10.5kg	19.7kg
B30R I	084392	930mm	298mm	133mm	18.2kg	27.4kg

DESCRIPTION

The main advantages of the blocfor™ R 20 automatic fall arresters are:

- Easy to handle carry and install
- Simplified maintenance through an optimized design
- Safety winch with a capacity of 150kg for the device with galva cable
- Safety winch with a capacity of 100kg for the device with stainless steel cable

NORMS

It complies with:

- EN360 & EN1496B standard
- CNB/P/11.062: Fall arrest with a capacity of more than 100 kg for galva cable
- EN795/A for the anchorage on the davimast console
