

APPLICATIONS

The tension indicator enables to check that the cable preloading is at 100daN by simply aligning a hole and a notch. Correct cable tension ensures correct operation of all the lifeline components in the event of a fall. Can be used with Tractel® Horizontal Life Line Travspring™, Travsmart, Travflex™, Tirsafe™.

TECHNICAL CHARACTERISTICS

- Material: Stainless steel
- Breaking strength > 30 kN
- Delivered with 1 connector MR9

APPLICABLE STANDARDS

EN 795C:2012
EAC TC 09:2011
CEN/TS 16415:2013
