TECHNICAL SHEET

**blocfor™ 20R & 30R
with davitrac bracket**

davitrac

Ref.: T-2558/EN
Revision: 00
Date: 02/2021

APPLICATIONS

blocfor™ R are self-retracting fall arresters with 20m and 30m cable equipped with a rescue winch. They can be fitted with galvanised or stainless-steel cable. They can be installed on the davitrac mast using a specific Tractel® bracket.

DESCRIPTION

The main advantages of using the blocfor™ 20R & 30R self-retracting fall arresters are:
- A very good grip for its transport and installation.
- Simplified maintenance thanks to its optimised design.
- A rescue winch allowing a user weighing 150 kg to be lifted for galva cable devices.
- A rescue winch allowing a user weighing 100 kg to be lifted for stainless-steel cable devices

TECHNICAL CHARACTERISTICS

The main features of blocfor™ 20R & 30R are:
- blocfor™ 20R equipped with ABS filled polyamide plastic casings, anti-UV, very resistant to shocks and ageing.
- blocfor™ 30R equipped with anti-UV aluminium housing, very resistant to shocks and ageing.
- A stop mechanism equipped with two latches that reduce the time of engagement in the brake gear.
- Good ergonomics that ensures a perfect grip.
- An anchor that can receive large diameter connectors.

Description	Height	Width	Thickness	Weight
blocfor™ 20R galva 150kg	900 mm	276 mm	118 mm	7.6 kg
blocfor™ 30R galva 150kg	930 mm	298 mm	133 mm	14.3 kg
blocfor™ 20R inox 100kg	900 mm	276 mm	118 mm	7.7 kg
blocfor™ 30R inox 100kg	930 mm	298 mm	133 mm	14.4 kg
davitrac bracket for blocfor™	490 mm	114 mm	202 mm	3.8 kg

APPLICABLE STANDARDS

The blocfor™ 20R and 30R with galvanised cable comply with:
- The EN360 and EN1496B standards
- To the technical sheet CNB/P/11.060 "horizontal use".
- To the technical sheet CNB/P/11.062 "fall arresters with a capacity greater than 100 kg".

The blocfor™ 20R and 30R with stainless-steel cable comply with:
- To the EN360 and EN1496B standards.
