

### Application

The Tractel® tracrod 150 kg anchor rod is a transportable anchor point which enables two operators, each weighing up to 150 kg, to work in safety. To install it ready for use, the tracrod 150 kg anchor rod is inserted into a stainless steel support mount which is secured in place permanently at the place of work

The console of the blocfor™ is installed and disassembled in few seconds

It settles on the head of the tracrod without any tools

It is certified to be used as an anchor for Fall Arrest and Rescue Systems,

### Features :

The blocfor™ console is painted steel.

It can be sold with or without blocfor™

It can be equipped with blocfor™ 20 - 30 - 20R -30R ESD 150kg

code N°	Description	Quantity mini	Size L x W x H mm	Weight kg With packaging	Description
