

Application

Height safety equipment is not only essential for preventing operator falls, but also for preventing tools from falling and causing serious injury. To complement its range of PPE fall arresters, Tractel® is launching a range of tool-holding accessories. Tool-holding lanyard designed to prevent all tools (max. weight 5kg) from falling, by connecting them to a safety harness. ETLS -1m-long extendible lanyard with a retractable, heat-sealable sleeve to safely grip tools with handles

Features

- Temperature range - 30°C à + 60°C.
- Material: polyamide strap
- CMU 5kg
- Weight 75g
- Length 1m
- 1 retractable, heat-sealable sleeve of 20mm
- 1 retractable, heat-sealable sleeve of 40mm
- 1 retractable, heat-sealable sleeve of 60mm

Description

There are no standards governing the Tractel® tool-holding straps; the items are essential accessories for operators who work at height. Tractel® tool-holders safely hold all tools, with weight not exceeding 5kg. Thanks to their polyamide webbing construction, they can withstand the most extreme conditions encountered on the sites: cold, heat, humidity, mould, corrosion and abrasion. Outre les outils de préhension sécuritaires, les cordons porte-outils Tractel® empêchent les outils d'être égarés sur les sites.
