

APPLICATION

Lanyard with energy absorber used has a connecting element between a fixed or mobile anchorage point and the attachment point on the harness
 The energy absorber safely stops a fall from a height. Without the shock absorber a free fall more 50 cm can cause serious injuries

CHARACTERISTICS

The LSA lanyard is formed by:

A 30 mm-wide strap made of rigid polyester fibers woven with an energy absorber

- Length (L) : 1,50 m - 2 m.
- Buckled and stitched
