

APPLICATIONS

The removable X-Pad gives rigidity to the harness making it easier to put on. It allows the shoulder straps of the harness to be moved away from the neck to improve the comfort.

This option can be fitted to all harnesses including those with Elastrac™ housings, It can be fitted by the user.

DESCRIPTION

The back X-PAD is made of a highly abrasion-resistant reinforced fabric on the outside, honeycomb foams for extra comfort and a honeycomb fabric.

TECHNICAL CHARACTERISTICS

The X-PAD significantly improves the comfort of use of the harness.

Other advantages of the X-PAD are:

- It is lightweight, to improve comfort;
- It provides good ventilation;
- It gives the harness a firm hold and thus makes it easier to put it on;
- It has two safety straps on the front (closed by snaps), designed to hang the lanyard or fall arrest connectors when not in use
- It includes a label holder on the left shoulder strap for easy identification.

APPLICABLE STANDARDS

The X-PAD is a comfort accessory that does not alter the fall protection characteristics of the harnesses it is fitted to. It is not subject to the fall arrest norm requirements.
