

DESCRIPTION

The dynafor™ smartphone application was developed by Tractel®. The dynafor™ app is a simple and quick smartphone application, used in combination with our Tractel® products.

Available on App Store and Google Play, the application allows you to connect one single smartphone to a Tractel® dynafor™ Pro, Expert or Transmitter WL & RS. One loadcell can be connected, up to a range of 30 meters.

The dynafor™ application is a useful tool for basic functions:

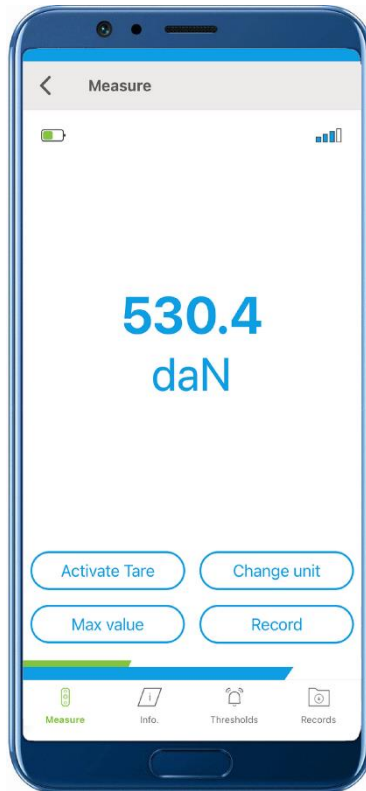

- Tare (Gross/Net)
- Units change (kN/ daN / lbs / t / ton (US) / kg)
- Peak hold mode
- 2 settable alarms
- Manual data recording with export function (.csv file) by email

Single loadcell reading

BLE up to 30m

Basic functions

Single smartphone connection

ACCESSORIES & REQUIREMENTS

The dynafor™ app shall be connected to:
