

## FABA™ EZ

Revolutionary slider for ladder applications

Our new FABA™ slider, the FABA™ EZ, offers ultimate flexibility when using our FABA™ ladder and rail. The FABA™ EZ can be inserted and removed at any point, without the need for tools or accessories.

# FABA™ EZ

Revolutionary slider for ladder applications

## QUALITY:

- Made in stainless steel
- Complies with the latest applicable standard and the PPE Regulation 2016/425.

## ERGONOMICS:

- **Specific design of opening:** designed to be used with one hand, leaving the other hand.
- **Built-in safety:** thanks to its unique design, the FABA™ EZ can only be used in the correct position.

## TECHNICAL CHARACTERISTICS:

- Complies with EN 353-1:2018
- Certified for users up to 150kg, including workwear and equipment.
- CE compliant.
- Available with manual screw or semi automatic locking connector.

## FLEXIBILITY:

- Can be used on our existing FABA™ ladder and rail A12 and AL2: no need for a new system installation.
- Can be used in a variety of work environments.
- **No need for special accessories:** entry and exit accessories are not necessary thanks to slider's design.

## SECURITY:

- **Asymmetrical slider :** For ultimate safety, the slider will work only if inserted in the right direction
- **Impossible to use incorrectly.**
- **Lightweight:** Easy to insert & use.
- Integrated energy absorber.

The FABA™ EZ can be inserted and removed at any point, without the need for tools or accessories.
