

Installation

Your Dock Door comes essentially fully assembled. Proper installation requires two people, a few basic tools and about 10 to 15 minutes.

Step 1: With the help of a partner, put the gate in the down position and latch it into the receiver post. Move entire assembly into approximate position.

Step 2: Align the left edge of the receiving post mounting plate flush with the edge of the door opening ("X"). Move the receiving post just far enough from the wall to avoid contact with the door track when the gate is opened ("Y"). The gap must not be wide enough to permit a person to slip through.

Step 3: Once in position, mark position of mounting plate holes on floor and drill holes to accept four (4) 1/2" fasteners per post (not provided).

Safety Note: Make sure the door is closed during installation to avoid falling off the ledge.

VG Series: Mounting Tips

Installation

Your Vertical Lift Gate comes essentially fully assembled. Proper installation requires two people, a few basic tools and about 10 to 15 minutes.

Step 1: With the help of a partner, put the gate in the down position and latch it into the receiver post. Move entire assembly into approximate position.

Step 2: Align the left edge of the receiving post mounting plate flush with the edge of the opening. Do not leave a large enough gap to permit a person to slip through, between the post and the edge.

Step 3: Once in position, mark position of mounting plate holes on floor and drill holes to accept four (4) 1/2" fasteners per post (not provided).
